

Basil Sunny

As an IT professional with 8 years experience in the industry, I have strong expertise in implementing and maintaining an efficient, scalable, and secure infrastructure for development, testing, and deployment of software applications. This includes managing and automating software build, release, and deployment processes, as well as monitoring system performance and troubleshooting issues. I am committed to staying current with industry trends and technologies to ensure that my skills remain relevant and effective.

Work Experience

Lead DevOps Engineer • Qburst

09/08/2021 - Current

 Full time

 Kerala, India

01/02/2023 - CURRENT	Lead DevOps Engineer
09/08/2021 till 31/01/2023	Senior DevOps Engineer

I leverage the skills and experience gained as an L2 Operations Engineer to oversee the entire software delivery pipeline. This includes designing, implementing, and managing the tools and processes that enable continuous integration and continuous delivery (CI/CD) of software applications. As part of my role, I also create and maintain the IT infrastructure ensuring that the underlying systems are highly available, scalable, and secure.

- Creating and managing IT infrastructure on public clouds using automation tools.
- Automating routine activities with scripting languages.
- Deploying business critical applications to production.
- Architecting and implementing observability solutions for microservices.
- Designing and implementing the CI/CD pipeline.

Associate L2 Operations Engineer • Mindcurv Technology Solutions Pvt Ltd

15/03/2018 - 04/08/2021

 Full time

 Kerala, India

01/09/2020 till 04/08/2021	Associate L2 Operations Engineer
15/03/2018 till 31/08/2020	L1 Operations Engineer

I build upon the skills and experience gained as a System Administrator, and are responsible for maintaining and supporting critical systems and applications in a production environment. I'm

responsible for monitoring system health and resolving issues that affect the availability and performance of these systems.

- Monitoring and responding to alerts and incidents, ensuring timely resolution of production issues.
- Creating and managing IT infrastructure on public clouds using automation tools.
- Deploying business critical applications to production.
- Collaborating with cross-functional teams to troubleshoot and resolve system issues.
- Performing root cause analysis on incidents and developing preventive measures.
- Automating routine operational tasks using scripting and automation tools.

Junior System Administrator • Activelobby Information Systems Pvt Ltd

14/1/2016 - 30/11/2017

Full time

Kerala, India

01/04/2017 till 30/11/2017	Junior System Administrator
01/04/2016 till 31/03/2017	Junior System Administrator - Trainee
14/01/2016 till 31/03/2016	Junior System Administrator - Probation

As a System Administrator for a web hosting support company, I was responsible for maintenance, configuration, and reliable operation of our customers' servers and networks. Troubleshooting technical issues and providing timely resolution to ensure customer satisfaction.

- Troubleshoot and resolve L1 and L2 issues for users of Mainframe servers.
- Installation, Configuration, Management and Maintenance of Linux Systems.
- Updating and patching of systems.
- Automating routine activities using Bash scripts
- Ensure 24*7 up-time for client's website.
